IMPORTANT

If you inflate the NoisySticks™ in an environment that is warmer than that which you use the sticks, the colder air will constrict and the sticks will become slightly decompressed. If this happens, please add more air to the sticks by blowing into the valve. We do not guarantee our NoisySticks™ to work effectively in cold temperatures and this is not a condition that we will accept the return of goods.

We strive to maintain prices at the lowest level. Occasionally, prices change without notice due to circumstances beyond our control.
